ACE

Potting Soil

DIRECTIONS AND USES

INDOOR/CONTAINER PLANTING

Remove plant from old container. Be careful not to disturb roots. Add enough Ace Potting Soil to new container so the plant will rest slightly above desired height. Place plant in pot and carefully fill with potting soil. Firm down to prevent air pockets. Water thoroughly and allow water to seep in. Add additional potting soil to within 1" of top. Fill to within 1/2" on top of smaller pots.

OUTDOOR PLANTING

Prepare a hole 1/3 larger than the root ball. Fill 1/3 of the hole with Ace Potting Soil. Place plant in hole. Be careful not to disturb roots. Add Potting Soil, compacting as you go to prevent air pockets, until hole is 3/4 filled. IMPORTANT: Firm again at this time. Fill hole with water and allow it to seep in. Do not tamp down after watering. Add sufficient Potting Soil to fill remainder of hole. Leave a slight depression below ground level.

FERTILIZATION

Do not apply fertilizer within the first 30 days or until plants are rooted and established.

INGREDIENTS:

In Georgia this product is formulated to contain: 45-55% Aged Pine Bark, Topsoil, Sand and Perlite.
